Box Non-Fee Amendment Commissioner for Patents Washington, D.C. 20231

OFFICIAL

Dear Sir:

Subsequent to the filing of a first Preliminary Amendment on November 4, 1998, and preliminary to a first Office Action in the above-identified reissue patent application, please amend the application as follows:

Please amend claims 2, 5, 6, 7, 8, 16, 18, 19, 20, and 24, and add new claims 25-81 as follows:

1. A method of operating a computer aided design system in presumptive mode, comprising the steps of:

moving a selected graphic object relative to a graphic pointing symbol;

determining when the selected graphic object is within a predetermined proximity of an underlying graphic object;

manipulating the selected graphic object into a geometric relationship with the underlying graphic object according to predetermined geometric rules; and

dynamically updating the geometric relationship based on movement of the graphic pointing symbol while the graphic pointing symbol remains within the predetermined proximity of the underlying graphic object.

5087 ABY

2. (Amended) The method of claim 1, wherein the predetermined proximity is a location tolerance before said manipulating step and converts to a larger rejection tolerance during said [maintaining] dynamically updating step.
